About This Game

Pepe Porcupine works the nightshift in a warehouse and needs your help! Each night his job is to move crates into position in a confined area with the least amount of work. Inspired by the Japanese game of Sokoban, which is a transport puzzle, in which boxes or crates are pushed about in a warehouse, your task is to correctly position crates with the least amount of pushes and moves. Played from a top-down perspective on a board of squares, crates can be shifted horizontally or vertically into empty squares, but never through walls or obstacles. Crates cannot be pulled, adding to the fun, and unless you help Pepe complete all 254 puzzles, he'll be stuck at the warehouse forever!

Key Features:

- 254 mind-bending puzzle challenges
- Undo-feature when you make mistakes
- “Head Scratcher” mode and “Head Banger” mode!
- Great graphics and fun animations

Title: Pepe Porcupine
Genre: Casual
Developer:
EnsenSoft
Publisher:
EnsenSoft
Release Date: 6 Jun, 2016

b4d347fde0

Minimum:

Processor: 1.0 GHz

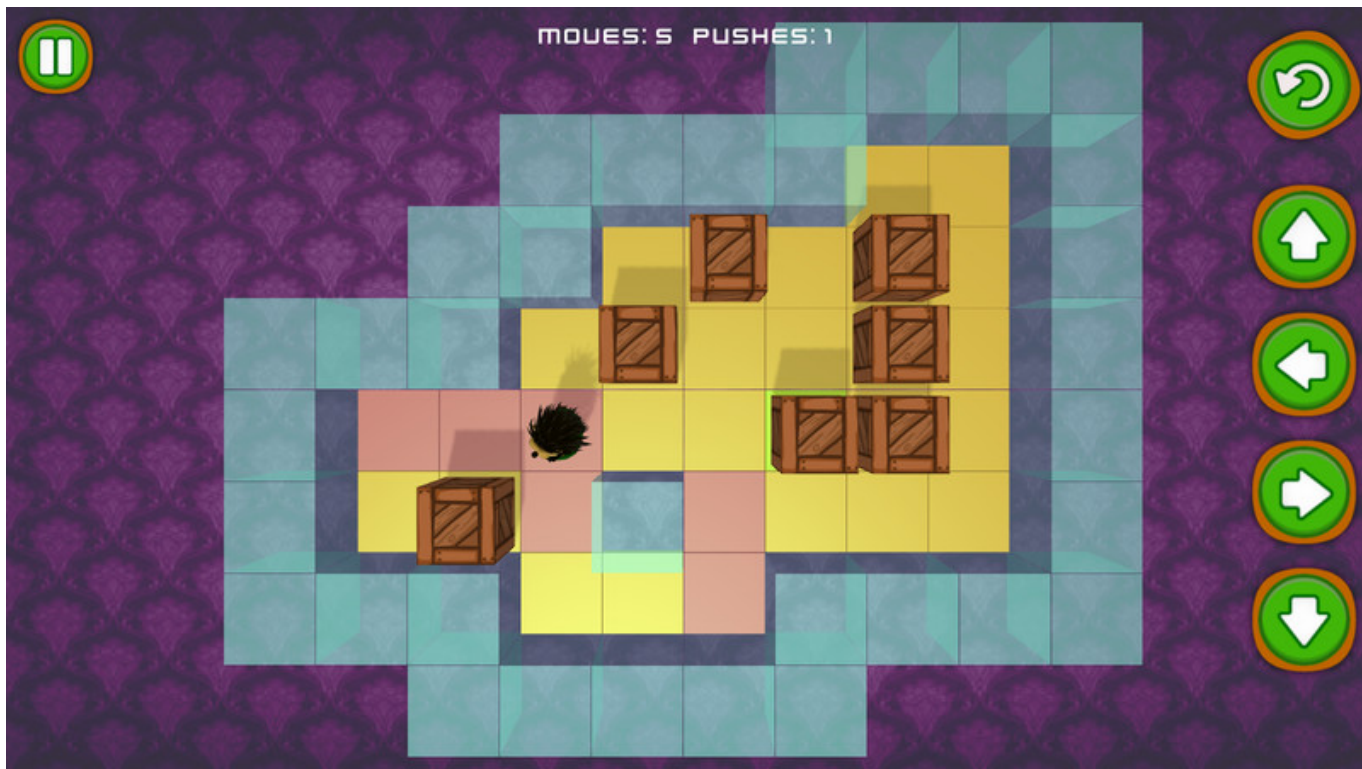

Memory: 1 GB RAM

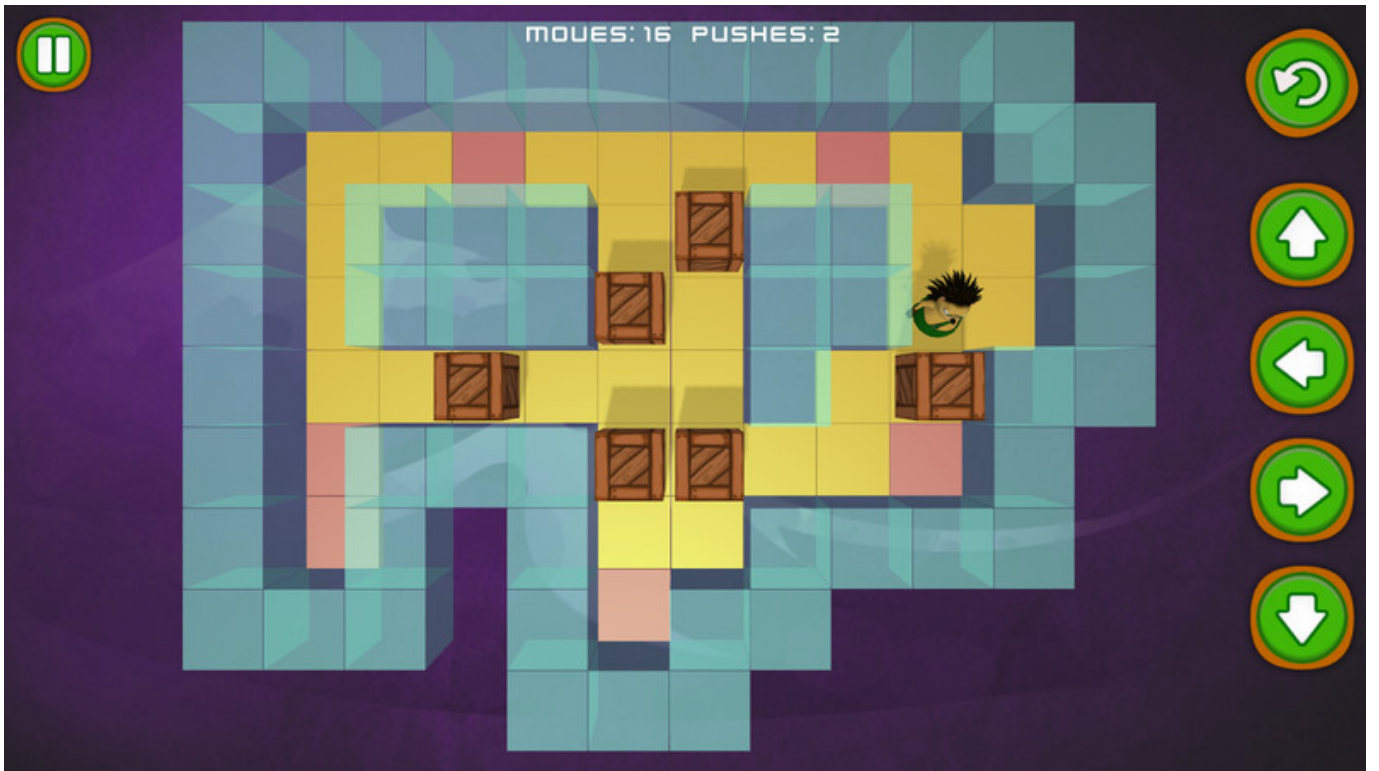

Graphics: vCard with DirectX 9.0 support

DirectX: Version 9.0c

Storage: 100 MB available space

English

Personally, I got this game as a joke between a friend and I. I never really played the game much, but it does look like it has potential. I don't see why it is \$2.99, though. It should be priced at maybe \$0.99. The music in the background is good and enjoyable. The only frustration that I have really had in my short-time playing it, (besides that I don't really like puzzle games and I stink at them) is that there is an extremely noticable key-delay. What I mean by this is that when you try to move your character, it takes around a second to register that, almost like you are lagging.

Overall, the game is decent, but not something I would play much. I would give it a 6/10, but a 9/10 for people who have strong thought processors.

I would say only buy this game if you have extra money on your Steam Wallet and you do not know what to do with them.. honestly m8 no one cares. \u2665\u2665\u2665\u2665ing good game. i wish it was pepe the frog but it is just a porcupine. so for that i give it a 7/10. \u2b50\u2b50\u2b50\u2b50. 10/10

Graphics

This game has stunning graphics and runs at 6,000fps along with 4k resolution.

Story

This game has one of the most tense and nailbiting storys i have ever seen, it has me on the edge of my seat at every turn and with every puzzle completed i was a step closer to one of the best endings a game could possibly have.

Gameplay

This game has one of the best engines i have ever seen, you feel so free and as if you actually are Pepe (the godly) Porcupine.

Music

This game has the best soundtrack the human ear can perceive, the music alone awakened me to the world and opened my eyes so i can fully witness life.

Puzzles

This game has the hardest but the most indulging puzzles i have ever seen, it took me hours planning on how i would beat every level.

Charactes

At the end of the game i felt emotionally actached to the porcupine embodiment of god himself Pepe, the character development is great and you really feel for the characters.

Symbolism

The game symboblises how the jews in Germany inside of the labour camps suffered and thier hardship this game captures that emotion and atmosphere perfectly, it shows how the jews had to do manual labour with little rest and no food and how the jaws of death loomed over the jews and could swallow them up at any turn and how the theme of fear was present in everyday life at the camps. The symbolism used by... THIS GAME IS MADE BY GOD HIMSELF AND IF YOU DO NOT BUY IT THEN YOU ARE NOT WORTHY TO ENTER HEAVEN. IF THE GAME CRASHES ON YOU WHEN LEAVING A LEVEL IT SHOW THAT YOU ARE A SINNER AND ARNT WORTHY TO PLAY THIS MASTERPEICE OF A GAME
